why PERFORMANCE PLASTICS

Commercial bathroom partitions are placed in harsh, high traffic environments that tend to be damp, making the materials susceptible to mold, mildew and rust. It is also common to encounter graffiti and vandalism in these public spaces.

It is important to invest in a worry-free product that will save you time and money.

Solid plastic partitions are built to last, down to every detail. Graffiti can be easily wiped clean with a common non-abrasive cleaner, and since Scranton Products performance plastic is formulated with a solid color throughout, scratches are difficult to see. Compared to other traditional material types, performance plastic has a greater resistance to impacts and dents providing you with a low maintenance restroom that will look great for years.

Eclipse Partitions - Color: French Blue, Texture: Orange Peel
Configuration: Floor Mounted Overhead Braced, Height: 72"

IMPACT AND DENT RESISTANCE TEST RESULTS

Depth of Impact

An impact test conducted following ASTM standards showed that Scranton Products performance plastic has 59 times greater resistance to impact when compared to metal.

Patent Pending

NO PAINTING

Scranton Products partitions are solid color throughout and will never require painting.

EASY GRAFFITI REMOVAL

Graffiti can be easily wiped clean with a common, non-abrasive cleaner.

CLEANER, HEALTHIER RESTROOMS

Impermeable to moisture, solid plastic's non-porous surface does not support the growth of mold and mildew and will never rust.

NATURALLY GERM RESISTANT

Scranton Products performance plastic partitions are naturally resistant to common bacteria including MRSA. Testing has shown that after 24 hours, 98.4% of MRSA died off the surface of solid plastic without the use of cleaning solutions or antimicrobial additives. What's more, Scranton Products partitions are fully power washable and steam cleanable.
